Between 1820 and 1827, Washington Square Park was a “potter’s field” where thousands (10,000) of yellow fever victims were buried below the grade. It became a military parade ground for a brief 2 year period (1827-29) and finally a park around which some of the finest homes were built. This park is an extension of our campus where you will often find students reading or hanging out. The park also hosts movies and TV shows.

(WALK ACROSS THE PARK TO THE ARCH.)

The crowning addition to this urban plaza is the triumphal marble arch designed by Stanford White. Erected in 1892 and funded through private subscription, it replaced a temporary portal raised to commemorate the centenary (1889) of George Washington’s inauguration as President. Like the park, the arch has become part of the NYU campus.
