Psychosocial Risk and Disease Prevention Study Section (PRDP)

The Psychosocial Risk and Disease Prevention (PRDP) study section reviews applications to develop and/or test behavioral interventions to prevent or reduce risk for morbid physical conditions or disease states, particularly chronic conditions in which behavior plays a major role in etiology and progression. Research may include psychosocial, environmental, pharmacological, or biological variables but the predominant intervention component should be behavioral. Specific areas covered by PRDP:

- Obesity prevention and intervention including efforts to reduce risk of further obesity development or to maintain weight loss
- Chronic disease risk prevention and interventions through changes in dietary intake and physical activity.
- Prevention and intervention of metabolic syndrome and diabetes development.
- Cancer risk prevention or reduction, including efforts to develop screening protocols, improve adherence to screening recommendations, and enhance quality of life in cancer survivors.
- Cardiovascular disease risk prevention or reduction, including efforts to reduce risk of subsequent cardiac events.

Study sections with most closely related areas of similar science listed in rank order are:

Behavioral Medicine Interventions and Outcomes Study Section [BMIO]
Biobehavioral Mechanisms of Emotion, Stress and Health Study Section [MESH]
Psychosocial Development, Risk and Prevention Study Section [PDRP]
Kidney, Nutrition, Obesity and Diabetes [KNOD] Community-Level Health Promotion Study Section [CLHP] Community Influences on Health Behavior Study Section [CIHB]
CHAIRPERSON
-----------------------
EPSTEIN, LEONARD H, PHD, (15)
SUNY DISTINGUISHED PROFESSOR
DEPARTMENT OF PEDIATRICS
DIVISION OF BEHAVIORAL MEDICINE
STATE UNIVERSITY OF NEW YORK AT BUFFALO
BUFFALO, NY 14214

MEMBERS
----------
ABRANTES, ANA M, PHD, (16)
ASSISTANT PROFESSOR
DEPARTMENT OF PSYCHIATRY AND HUMAN
BEHAVIOR, ALPERT MEDICAL SCHOOL
BUTLER HOSPITAL
BROWN UNIVERSITY
PROVIDENCE, RI 02906
